

Afinion Project-Viewer Version 5.1

Main Features

- ? Afinion Project-Viewer visualises plans in Microsoft Project format (mpp) as well as of SAP PS. You neither need Microsoft Project nor SAP PS. You don't even need a SAP GUI.
- ? Afinion Project-Viewer opens files in the original Microsoft format (mpp) and from databases (Access, SQL, Project Server). It is compatible with Microsoft Project 98 to 2007.
- ? Afinion Project-Viewer supports Microsoft Excel. It includes saving of column definitions in Excel so that you always obtain the same display.
- ? If the project manager has used custom views (e.g. a company specific view), these will be displayed in Afinion Project-Viewer.
- ? Afinion Project-Viewer adopts the columns with the custom headings as defined by the project planner.
- ? Afinion Project-Viewer is the only viewer that displays the dependencies in the GANNT view.
- ? Afinion Project-Viewer adopts the bar chart formats and labeling as defined in the Microsoft Project bar chart views.
- ? Afinion Project-Viewer allows free definition of the date format in the table.
- ? Afinion Project-Viewer shows project definitions, pert charts, WBS elements and activities from SAP PS (Windows Version only).
- ? Afinion Project-Viewer always displays the actual status, no import/export needed.

- ? In Afinion Project-Viewer you can define the time scale freely, so that you can view your activities on a daily, weekly or monthly basis.
- ? Display of links, milestones and summary tasks in Excel!
- ? Freely configurable startup screen (e.g. integration of your intranet) and import of your logo for display and printing.
- ? Menu configuration by the Administrator: Display of available modules and languages.
- ? New option: Print table only if you just need a list.
- ? New fields: Date1-10, Duration1-10, Start1-10, Finish1-10, Flag1-10, Number1-20, Text1-30.
- ? Display of graphical indicators.
- ? Use of existing Java runtime versions.
- ? Afinion Project-Viewer supports Microsoft Windows Terminal-Server and Citrix Metaframe/XenApp.

Time Recording

- ? Two modes for Time Recording:
 - o Mode 1: All members of the resource pool are allowed to report work hours.
 - o Mode 2: Only resources assigned to the project are allowed to report work hours.
- ? The project manager decides who can report his work hours on which activities.
- ? Actual hours and % complete are shown directly on each activity without modifying the plan.
- ? Every project member directly sees his/her work portfolio in the Afinion Project-Viewer and can then plan his work accordingly.
- ? The Red Light function of Time Recording is available automatically.
- ? No plan modification by Time Recording as in Web-Access.
- ? Employee cost can be calculated directly in Microsoft Project.

Other Features

- ? Afinion Project-Viewer runs as a Java application, so that you will not need a complex installation. You neither need a browser nor any other viewer.
- ? Afinion Project-Viewer runs as application or as service.
- ? Afinion Project-Viewer runs on Windows, Mac OS X, Linux and Unix. The Windows distribution contains Sun Java runtime, the other versions require a separate Java runtime installation. The required Java runtime can be downloaded free from Sun (<http://www.Java.com>).
- ? Afinion Project-Viewer can directly enter the activities assigned to a resource into its Outlook® folder.
- ? Afinion Project-Viewer disposes of a Server Mode.

- ? You can print plans in sizes from A4 to A0, only limited by the available printers and plotters.
- ? Uses Microsoft Standard Installation format (.msi) to allow for integration in your software distribution system.
- ? Afinion Project-Viewer is independent of the language. Languages currently available are English, German, Dutch, Italian, Spanish, French, Chinese, Swabian, Swiss German and Lëtzebuergesch.
- ? Afinion Project-Viewer now supports Korean, Chinese and Japanese character sets.

Other databases (apart from those mentioned above) can be implemented on request.

Other languages may be supplied on request at short notice.
